SUMMARY

iOS software developer with a background in custom service. Years of experience with Java and object-oriented programming, and a strong understanding of data structures and algorithms.

SKILLS

Swift

Python

Java

Objective-C

Xcode

UIKit

SwiftUI

REST APIs

GraphQL APIs

CoreData

CloudKit

Git & Github

Concurrency

Unit Testing

UI Testing

Cocoapods & Carthage

Firebase

MapKit

Projects

Habit Tracker

Swift | CloudKit & CoreData | Local Notifications | JTAppleCalendar

Build new or strengthen existing habits with a beautiful design.

- Devised and executed app's development plan, working with one other iOS developer.
- Created beautiful design and simple user flow.

Community Calendar

Swift | Auth0 | GraphQL | AWS | Notification Design Pattern

Remain in the loop as events are hosted in your neighborhood with Community Calendar.

- Developed on a remote, cross-functional team of 12 over eight weeks.
- Prioritized user-valued features to use time in the most effective way.
- Functioned as one of two iOS developers on a team composed of two Front End, three Back End, and three Android developers, as well as two UX Designers.

Experience

dōTERRA

Customer Service Representative, Orem, UT | June 2018 – October 2018

- Consulted with customers on account problems, general questions, and product orders.
- Refined communication skills with customers as well as fellow employees.
- Handled sensitive information (credit card info, SSN) with care and responsibility.

Shailys

Finance Assistant, Springville, UT | June 2014 – August 2014

- Organized documents and files for the CFO.
- Developed new filing and organizational skills and practices.
- Worked in a fast-paced environment.

Education

Lambda School

Online | August 2019 – April 2020

- Completed a 40-week iOS development training program.
- Engaged python, algorithms, data structures, graphs, C, and other operating systems.
- Created many iOS projects in Swift and Objective-C.
- Developed a strong problem-solving mindset.

Shanghai American School

浦东 Shanghai, China | August 2017 – June 2019

- Completed AP Computer Science course in Java.
- Learned sorting, searching, and other algorithms.
- Learned about data structures and memory management.

Accomplishments

- Eagle Scout – Earned Eagle in 2017 and learned leadership and hardworking skills.
- Service-Oriented - Participated in local youth council, taking part in service activities.
- Leader - Editor and Chief of yearbook senior year at Shanghai American School. Learned team leading skills and gained a strong attention to detail.
- Communicator - Lived in China for a total of 4 years, attended an international school, and was introduced to a vastly diverse set of cultures, ideas, and experiences.
